

CCpilot VC STARTER KIT

The **CCpilot VC Starter Kit** includes all hardware and software needed to try out CCpilot VC and rapidly get going with developing your application. It comes in an all-in-one box with a getting started manual. Just unbox it and get going!

CCpilot VC is a freely programmable, multifunctional 5" display computer for industrial vehicles. It comes with LinX Software Suite, an open software platform which offers a choice of powerful tools for application development. This, together with a WVGA

resolution, high brightness display and hardware accelerated 2D, 3D and vector graphics, enables fast design of premium user interfaces. CCpilot VC comes in different versions - Touch screen, soft keys and optically bonded glass are optional.

Starter kit contents

ITEM	DESCRIPTION
CCpilot VC	Three versions available, see ordering information below.
Software and documentation	LinX software platform runtime and CoDeSys runtime is pre-installed on the device. Hardware manuals, LinX development environment, getting started instructions are downloaded from our support site: http://support.crosscontrol.com
Training	Free on-line training webinar on LinX Software Suite, helping you to unleash the full potential of CCpilot VC in your application.
