

Product Change Notification ID#0234

Level of Change

- ☒ Product Change Notice – Customer Information
- ☐ Product Change Notice – Customer Approval
- ☐ End of Life Issue – Required Customer Action
- ☐ Errata – Customer information

Affected Product families

#	Product Part Number	Product Name	Revision after change
1	C000 152-06	CCpilot V700, CC Linux 2	1.0

Product Attribute Affected

- ☐ Material Change
- ☐ Design Change
- ☐ Software Change
- ☒ Other: Structural change of product BOM
- ☒ Process Change
- ☐ Data Sheet Change
- ☐ Packing/Shipping Change

Impact of Change

- ☐ Form
- ☐ Fit
- ☐ Function
- ☒ No change in form
- ☒ No change in fit
- ☒ No Change in function

If applicable, see description below.

Description of the Change

Currently, both final testing and software loading are performed using the GTE test equipment. This setup results in prolonged equipment occupancy, as only one unit can be tested or loaded at a time.

To improve efficiency and increase throughput, we plan to separate these processes. Final testing will continue to be conducted on the GTE, while software loading will be transferred to a dedicated loading station. This approach is already successfully implemented across other CrossControl products.

Following actions will be taken:

- Structural change of product BOM
- Setup and configuration of software loading station
- Process quality plan documentation updates to reflect new process step
- Work instruction updates
- Pre-series validation

Reason for Change

Enhance overall productivity and reduce bottlenecks

Recommendation

No specific recommendation.

Estimated Change Date

No earlier than 2025-10-25 [YYYY-MM-DD]
