If applicable, see description below.

Reason for Change - Information

We are terminating the Universal Terminal software component in our software platform. This means that the subject part numbers are terminated. The base products CCpilot V1000, V1200 and VS are still available with the LinX software platform standard offering, meaning pre-packed toolchains for either Qt or CODESYS application development.

Recommendation

The majority of customers that have used our ISOBUS UT software component in the past have already migrated to the SmartCommand 10" and 12" terminals provided by our partner Reichardt.

These ISOBUS terminal solutions are based on the V1000 and V1200 display computers.

Your CrossControl Sales representative can refer you to the appropriate contact at company Reichardt.

Information and dates

We offer one last opportunity to buy the products that will be terminated as table above if Non-cancelable, non-returnable (NCNR) orders are placed no later than 2025 06 30.

Last order date: 2025-06-30

Last shipment date: 2025-09-01
